

structura studio 360°

Our online event platform is approved by the Federal Guard Service of Russia

Our platform is thoroughly outfitted with everything needed to host any time of event, from business meetings to interactive shows and music performances.

The studio is capable of providing 360-degree video shooting which yields even more engaging footage.

If you're planning to hold a highly unique event, our team will develop a customised offer and adapt the venue to your specification.

SERVER HARDWARE

- Intel Core i7 / Xeon-based server workstations with Nvidia Quadro Graphics GPUs

СМОТРЕТЬ

WITH ALL YOUR VOICE: AN INTERNATIONAL TV SINGING COMPETITION

This is the first TV project where teams representing different countries are competing. Talented youth 12-17 are representing their own national culture and singing contemporary Russian songs.

The competition is organised by Children for Children regional charity and Federal Agency for the Commonwealth of Independent States Affairs, Compatriots Living Abroad, and International Humanitarian Cooperation (Rossotrudnichestvo).

In order to telecast the content on MIR 24 Channel, our team set up Structura Studio 360 for shooting. Entrants and instructors from 10 countries were on live air one by one.

BIS SUMMIT 2020

BIS SUMMIT 2020

The 13th BIS SUMMIT was an information security conference that took place in 2020.

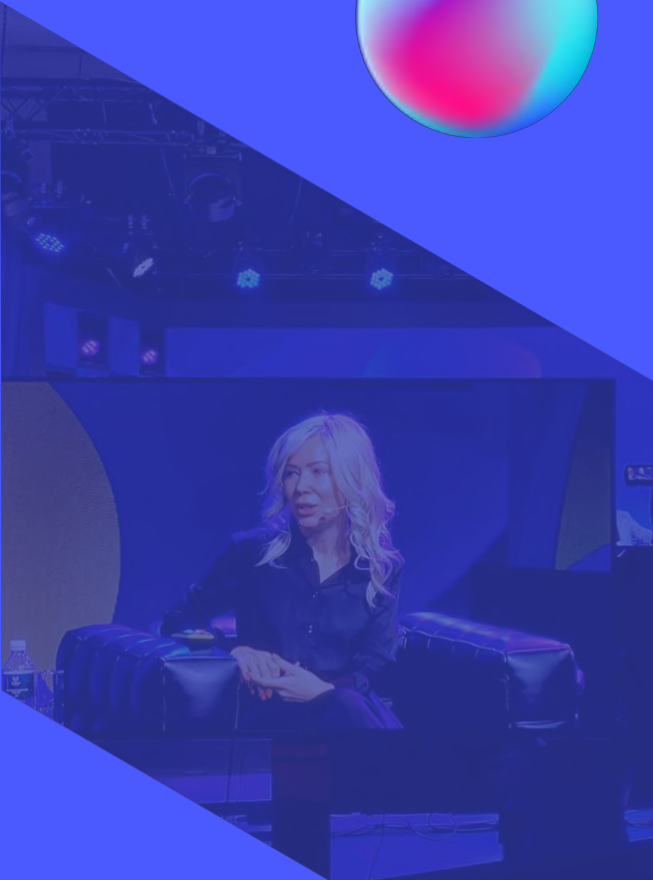

For the first time, the summit was held online; over 2,000 attendees gathered together in a single digital space. The capabilities of our Structura Studio 360° and Structura Digital Platform greatly contributed to that project and made the event a reality.

In 2020, many businesses found themselves bound to introduce new technologies. The issue of information security and cyber protection thus came to the forefront. At this summit, cyber pundits spent two days discussing key issues of multi-level digital transformation and all specific features, impacts, and risks it involves.

FABERLIC
BE YOUR BEST

FABERLIC DIGITAL CONFERENCE

On 28 October, the Faberlic Digital Forum was live streamed.

For this event we interconnected four remote studios, including Structura Studio 360, via live streaming.

In this event, the brand presented new business development tools, latest news and products. President Alexey Nechayev answered the attendees' questions.

The event's recording has since been viewed over 65,000 times. Scroll through the photos and feel the forum's atmosphere!

Amway MMIT

A NEW PLATINUM PRO-SUCCESS SEMINAR

Jointly with BUREAU42 event agency, we were part of organising a New Platinum Pro-Success Seminar for Amway, which took place on 31 October – 1 November and was the first-ever digital event of that magnitude for the company.

Together with our colleagues, we succeeded to transform the event into an online one. BUREAU42 developed a creative concept, whereas we took care of the project's technical side.

At our Structura Studio 360 platform, our team set up the video shooting, live streaming, and live contributions by keynote speakers.

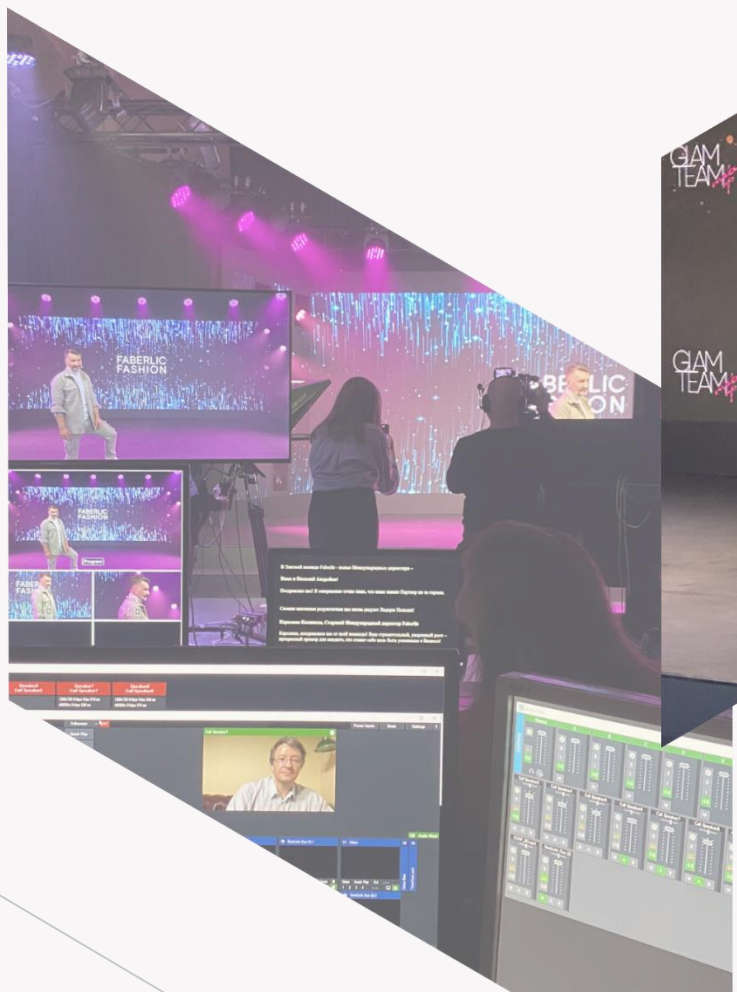

The corporate award ceremony was supposed to be the high point of the event, and therefore we and the presenters Konstantin Anisimov and Aurora immersed the audience into a festive and inspiring atmosphere.

INTERCOM

INTERCOM 2020 CONFERENCE

INTERCOM is a conference on business communication technologies in the new reality. It was held on 15 October and was a huge success.

The INTERCOM annual conference invites major businesses and IT companies. They discuss latest communication products and their practical use. The event's programme includes cases, market trends, and technical details.

This year, we helped transform the conference into a new "hybrid" format by providing a high-quality camcorder shooting and content distribution. Using Structura Digital Platform, contributors discussed the rollout of latest communication solutions in the new reality.
